How to limit lines of text with CSS

1-first we need to set the display for the <p> or any block element display property as display: -webkit-box

2- we need to set property -webkit-line-clamp: x number of lines we want

3- we need to set property -webkit-box-orient: vertical

4- set overflow: hidden property

The result is the text will be limited with ellipsis of three dots at the end.

```
.block {
    display: -webkit-box;
    -webkit-box-orient: vertical;
    -webkit-line-clamp: 4;
    overflow: hidden;
    width: 300px;
}
```

Global Goals

1 The term "Global Goals" typically refers to the
2 United Nations' Sustainable Development Goals
3 (SDGs). Global Goals contain 17 interconn
4 goals that were adopted by world leaders at the...
